

Swine Flu MMS Protocol

(Source: <http://mmswiki.is/>)

I was one of the first people in Mexico to get the swine flu. I, of course, didn't know what it was. I soon found out that it was very powerful. I didn't cough a lot. I just had fever and I felt very bad.

At first I took too much MMS and I felt much worse. I decided to go to the hospital and see what their diagnosis would be. I was in Mexico, but their hospitals are very good. One of my very good friends drove me in to the emergency entrance. When I opened the car door there were 3 nurses to help me into a wheel chair and off we went to an emergency room.

They began all the standard stuff, but the main thing was the x-ray. They x-rayed my chest mostly and they took some blood. After a while the doctor came back with the x-ray. He showed me. My lungs were filling up with mucus and they were very close to full. Although I had no pain and my breathing wasn't labored there was very little lung area left to collect oxygen. The doctor was surprised as I wasn't coughing, nor was I breathing extra hard. I actually was having a bit of trouble with my breath, but I wasn't showing it outwardly very much.

They surmised that it was viral pneumonia of unknown origin. You may not know this, because it isn't advertised very much but modern medicine with all their drugs has nothing that can affect a virus. There is nothing that they can give you that will fight a virus. All they can do is give you some antibacterial medicine that will prevent various bacteria from catching on in addition to the viral infection. So they do nothing to kill the virus.

For whatever reason, they don't seem to be interested in the fact that the two chemicals that the immune system manufactures to fight microorganisms, hypochlorous acid, and chlorine dioxide can not only kill bacteria, but they both can kill viruses. The doctor said, "I have to tell you that this is very serious. We will need to keep you here so we can keep close watch. We have the equipment here to save your life if you should choke." So they took me to my own room.

This is where the MMS comes in. I continued to take MMS every hour while I was awake in the hospital. I didn't take much each hour. I only took a drop an hour at first. It was right under my bed with other stuff and I never took it while the nurse was there. After a while I went to 2 drops an hour. I was sick, very sick but my friends stayed with me. I always had one friend there and they fixed the MMS, and while they were not present, I fixed it myself.

The doctor was quite surprised at how fast I recovered. I was taking their pills as requested. Why not, I have never noticed any reaction between MMS and drugs. They released me when my lungs were about 50% recovered to go

home and stay in bed. I increased the MMS drops a little and didn't stay in bed. I returned to the hospital every couple of days for an x-ray and my lungs continued to get better.

My secretary got the same flu and it took about a week to clear her up. The swine flu is powerful as most flu takes only 24 to 48 hours to clear up with MMS. However, I would believe if one will follow the protocol given below it will clear up much faster than it did with me. I took too much MMS at first not realizing what was happening.

Too much MMS killed off too much of the flu and dumped too much poison into my system. MMS turns mucus into water and releases the viruses trapped in the mucus. I was simply killing it too fast. So you have to watch that. Keep this in mind, MMS is supposed to make you feel better, if it makes you feel worse, you have just taken too much. That could be anywhere from 1/2 drop to 100 drops.

THE MMS PROTOCOL FOR THE NEW FLU (GOVERNMENT GENERATED FLU) THAT THEY LIKE TO CALL H1N1: THE PROTOCOL IS SIMPLE.

1. JUST TAKE MMS EVERY HOUR STARTING WITH 1 DROP AN HOUR. REMEMBER, TOO MUCH CAN BE VERY BAD. TAKE 1 DROP AN HOUR FOR THREE OR FOUR HOURS AND SEE HOW YOU ARE DOING. IF YOU ARE NOT FEELING WORSE, YOU CAN GO TO 2 DROPS AN HOUR. DO THAT FOR THREE OR FOUR HOURS AND IF YOU ARE NOT FEELING WORSE GO TO 3 DROPS AN HOUR.

2. IF YOU ARE NOT GETTING BETTER YOU REALLY NEED MORE DROPS, BUT IF YOU ARE FEELING WORSE, YOU NEED FEWER DROPS. YOU MUST NOT REMAIN STATIC VERY LONG. THE FLU CAN GAIN ON YOU. THE IDEA IS TO TAKE AS MANY DROPS AN HOUR AS YOU CAN TAKE WITHOUT IT MAKING YOU FEEL WORSE. YOU MUST DO THIS AT LEAST 8 HOURS STRAIGHT DURING THE DAY. IT WOULD BE EVEN BETTER IF YOU DID IT FOR 12 HOURS STRAIGHT. DO THIS EVERY DAY UNTIL YOU ARE WELL.

3. USE THE SAME PROTOCOL FOR CHILDREN. START WITH 1/2 DROP AN HOUR. OBSERVE THE CHILD CAREFULLY AND ASK QUESTIONS. INCREASE THE DROPS AS YOU CAN, BUT DON'T GIVE THEM TOO MUCH. YOU WILL BE ABLE TO SEE WHAT IS NEEDED, BUT NEVER GO MORE THAN 2 DROPS AN HOUR FOR EACH 50 POUNDS OF BODY WEIGHT (ABOUT 23 KG) AND YOU WOULD NEVER GO MORE THAN 4 DROPS AN HOUR FOR EVEN A LARGE CHILD. BUT CHECK CLOSELY AND NORMALLY DON'T GO OVER 2 DROPS AN HOUR FOR A CHILD.

You may say, that's too complex, I'm going to the hospital. Well, they don't have a single thing in the hospital that is anywhere near as strong as MMS. In fact they don't have anything that fights virus at all. You are genuinely risking

your life to go to the hospital. They will put you in bed and on a respirator. But those things can't fight a virus. The respirator might keep you alive longer but it cannot fight a virus.

One other thing, there is also MMS2 and it is just as powerful as MMS1, and when you add them together they are much more powerful than either one alone. I have already proven that point. There are two places where you can order MMS2 capsules ready made in a bottle - ready to take.

Got to mmswebsites.com to find sellers of MMS2 in Capsules.

You can also buy the chemical and make your own capsules if you purchase empty size zero capsules from a health food store. Directions for making MMS2 capsules are on this web site . If you were having real problems getting rid of the swine flu or any other disease, you should have MMS2 to use as well. You can buy the chemical in any city in the US.

At the swimming pool store, ask to see their "Pool Shock" chemical. Store clerks may not recognize the chemical name, so simply refer to it as "Pool Shock."

The various trade names don't matter ("Zapper" "PoolLife" and others). Carefully look on the pouch or package. You must see clearly that it is "Calcium Hypochlorite" and not some other chemical. The strength may vary from 50% to 78% or even 100%. The strength doesn't matter much and 75 or 78% is typical. There is no acid or any other activator - except WATER which is the activator. MMS2 will probably handle the swine flu all by itself. The chemical is calcium hypochlorite. Read about it on my web site.

There are warnings written all over the package and they are necessary because children and even adults roam around swimming pools and they can be harmed if they don't realize that the package must be kept out of reach away from children and guests. The warnings are appropriate for swimming pool owners.

The main purpose of these man-made viral releases and diseases is to put millions of people in position to receive a flu shot. It isn't the disease that they are really concerned with, it's the flu shot that they want to give you. They will make billions on this flu shot and then you will be sick for years and they will make billions on all the people they made sick. And then you will die years earlier than you would otherwise and they will make billions because they do not pay your old age benefits. That flu shot has mercury and aluminum and formaldehyde and one other poison more deadly than mercury in it - Squalene. Look it up in the search engines. It will remain trapped in your system for life and do continuing damage - worse than the Gulf-war syndrome that over time stiffens and removes your flexibility, for which there is no known remedy.

I have been treating people around the world for years now. There are hundreds of diseases that were created in laboratories around the world. They can't hide it very well. It always becomes known. AIDS was created in a laboratory in the USA. There are dozens of others that were made that are very bad. Some are worse than others. We have to get people around the world and in the USA to pull their heads out of the sand and confront what is happening to them. Hundreds of these disease were not around 150 years ago. I have listed over 150 diseases on one web site. See <http://MMSanswers.org/> . Most of them were never heard of before the last few years. Be smart. Stay safe. It can't hurt to listen. Avoid flu shots it at all possible.

As Always With Love,
Jim Humble
